HTML, CSS, JavaScript, TypeScript, React, Redux, Zustand, Git, React Hooks, SCSS, SASS, AJAX, NextJS, JEST, Redux Toolkit, ReactQuery, StoryBook, Npm, NodeJS, VueJS, Agile, Mobile Development, Performance, Responsive, Rest API, RestFul, Performance, Clean Architecture, LESS, Responsive Design

EXPERIENCES

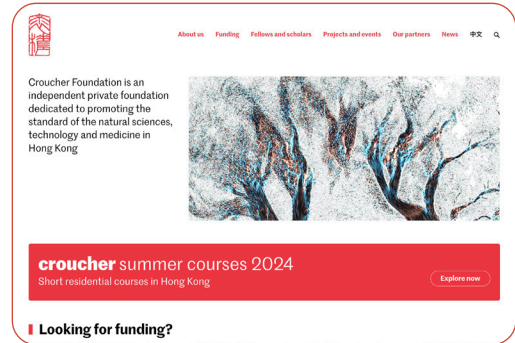

- Newsmast Social Application for First 3 months
<https://newsmast.org/>

Newsmast is a social platform built on Mastodon, aiming to provide real-time updates for each timeline, similar to Twitter

- Present - Croucher Foundation
<https://croucher.org.hk/>

Currently, I'm working on a project for the Croucher Foundation based in HongKong. I'm updating their old WordPress site to Next.js, incorporating CMS editor tools for a more modern and efficient user experience. For more information about the Croucher Foundation

MoMoney
<https://www.mo.com.mm/>

ReactNative Developer
Fulltime - Jan 2023 ~ June 2023 · (6 months)
Myanmar,

I played a pivotal role in fostering collaboration with the Vietnam team. My focus was on articulating and fulfilling essential requirements for feature development using React Native. Working within a team proficient in core banking, I specialized in API integration and implemented crucial error logging features for app development. This experience not only strengthened my skills but also contributed significantly to the enhancement and stability of the application. Presently, I am considering a hybrid offer from the BinaryLab company, eager to further diversify and deepen my expertise in the field.

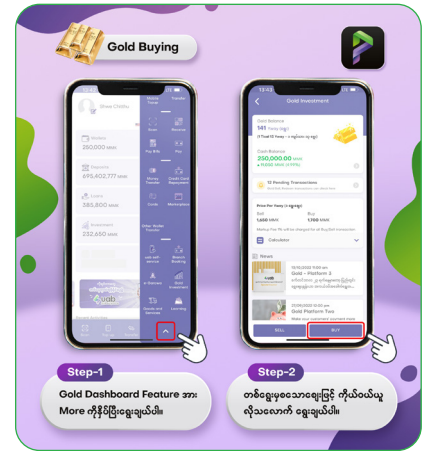

uab Bank
<https://www.uab.com.mm/>

ReactNative Developer
Fulltime - Jul 2021 ~ May 2022 · (Almost 1 year)
Myanmar,

At this time, I find it quite challenging as my background is in frontend web development. However, in my current role, I work as a mobile developer with React Native. Fortunately, the transition isn't taking much time because ReactJS and React Native share many similarities. Despite this, I need to familiarize myself with some native modules for specific app functionalities.

I am responsible for overseeing the transition from version 1 to version 2, and implementing the exciting gold exchange feature for our banking company's app.

EXPERIENCES

Move Move Everything part of Venus Lab
<https://www.linkedin.com/company/venuslab>

Senior Frontend Developer
Fulltime - Jan 2021 ~ Jun 2021 (6 months)
Myanmar,

During this period, I faced a significant challenge as my background primarily focused on React and Vue.js, while the company predominantly utilized Angular 11. Despite the learning curve, I dedicated myself to the role and successfully contributed to the development of an internal dashboard.

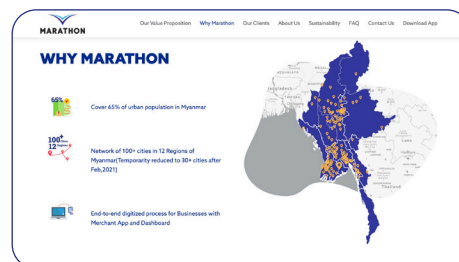

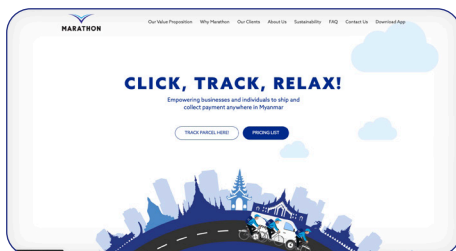

The company, a subsidiary of VenusLab, operates in the logistics sector. Unfortunately, my tenure was cut short at six months due to the onset of the COVID-19 pandemic. Regrettably, remote work was not feasible, hindering our ability to continue collaboration.

Marathon Myanmar
<https://marathonmyanmar.com/>

VueJS Senior Frontend Developer
Fulltime - Jan 2020 ~ Dec 2020 (1 year)
Myanmar,

My primary focus was on crafting seamless user experiences through the integration of UX/UI design with coding for the Marathon Web platform. Utilizing Nuxt.js, a Vue.js Server Side Framework, I was instrumental in developing internal portals, including an agent portal and a customer service portal. Additionally, I created dynamic data tables using JavaScript to enhance functionality and user interaction..

EXPERIENCES

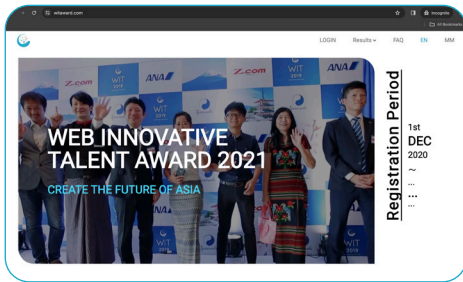

Spiceworks Myanmar

<https://www.spiceworksmyanmar.com/>

Part-time Frontend Developer as Student
(Mar 2018 - Nov 2018) 9 months
Japan-Myanmar,

I specialized in ensuring pixel-perfect designs and client-side frontend development using HTML, CSS, and JavaScript. My responsibilities included maintaining a high standard of visual precision and collaborating with clients to achieve their desired frontend designs.

One of my significant achievements was spearheading the development of the WIT 2019 landing page, where I took on the responsibility of translating creative concepts into functional and visually appealing web designs. This involved collaborating closely with stakeholders and incorporating their feedback to ensure a seamless user experience. My role extended beyond mere coding, as I played a key part in shaping the overall user interface and experience.

WIT - 2019 design by Me

Fairway Technology

<http://fairway.com.mm/>

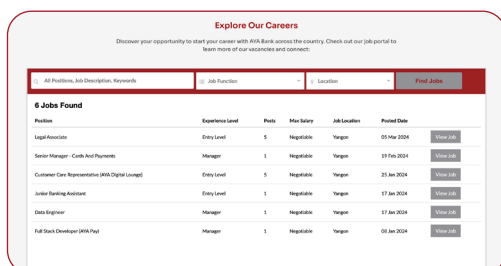

Fulltime - 9 months, Myanmar

- Internship Program
(May 2019 - Oct 2019) 6 months

I was selected as an intern and actively contributed to projects involving Vue.js and React.js during this period.

- 3 months Junior Program
(Nov 2019 - Jan 2020) 3 months

At this time, I had the opportunity to work with ReactJS on the career listing page on large project, similar to a job-finding platform and it is for AyaBank.

AWARDS

Unihack Champion

Unihack, Myanmar University's most challenging hackathon at the time. Awarded Champion in 2018 for developing an innovative web application using cutting-edge blockchain technology.

WIT Design Award 2018
